SUMMARY

Full Stack Developer with 4+ years of experience building scalable web, mobile, and desktop applications. Proficient in Node.js, Express.js, React Native, MongoDB, PostgreSQL, Nest.js, React.js, Next.js,   ypeScript, and JavaScript. Experienced in integrating smart contracts and building Web3 applications, with growing expertise in AI–powered solutions using OpenAI APIs for real–time automation, chat features, and intelligent user experiences.

SKILLS

Javascript, Typescript, React.js, Next.js, HTML5, CSS3, React Native, Node.js, Express.js, Nest.js, MongoDB, PostgreSQL, Material UI, Objection.js, React–testing–library, Jest, AWS, git, Heroku, postman, Web 3.0, MetaMask, Ether.js, Firebase, Redis, GraphQL, Socket.io, Cloud–flare, Open API Integration, Langchain, LLM Integration, prompt engineering.

EXPERIENCE

Senior FullStack Developer

CodeCraft   **July 2024 – July 2025, Remote (New Zealand)**

· Built 5+ core features for a healthcare app in React Native, including login, splash screen, and subscriptions with promo codes.
· Helped launch the app from scratch, handling UI, state management, and API integration in a fully remote setup.
· Built a quiz generator platform end to end, with subdomain automation, UI customisation and Meta Pixel tracking, powering 100+ quizzes.

MERN Stack Developer

RenesisTech   **December 2023 – July 2024, Lahore, Pakistan**

· Developed 2 major decentralised Web 3.0 applications, enhancing user engagement and security.
· Implemented smart contract integrations with Polygon and USD , optimising reliability and transaction processes.
· Collaborated with a team of 10+ and contributed to 6+ projects building 2 from scratch.

Software Engineer

GoSaaS Labs   **August 2022 – December 2023, Lahore, Pakistan**

· Maintenance and enhancement of product and added new features according to client requirements, collaborating with a team of 12+.
· Integrated Socket.IO to establish real–time, bidirectional communication between the server and client for handling long–running processes.
· Developed modules to improve application performance, resulting in 25% more user satisfaction.

Associate Software Engineer

The Dev Corporate   **October 2021 – July 2022, Lahore, Pakistan**

· Integrated 3rd party APIs e.g. Stripe for payment module, SendGrid for email verification, and OneSignal for push notifications in 3+ applications built using Express.js & Node.js.
· Constructed server–side web services & Restful APIs, designed schemas for 3+ scalable databases.
· Developed a backend application using Nest.js from scratch and integrated Stripe for payments.

MERN Stack Intern

Tbox Solutionz   **July 2021 – September 2021, Lahore, Pakistan**

· Learned the entire MERN Stack. Completed 4+ practice projects.
· Contributed on a live project and fixed 13+ bugs.
· Collaborated with a team of 12+ and learned SDLC.

PROJECT

Health Quiz
CodeCraft · quiz.health/
· Automated subdomain provisioning for 100+ quizzes via Cloud-flare API, enabling instant deployment of new quiz links.
· Integrated Meta Pixel to track user behaviour across 1,500+ weekly sessions, supporting data-driven campaign insights.
· Built a fully customisable admin panel allowing runtime changes to quiz UI, text, and flow, used to manage 200+ active quizzes without code changes.
· Streamlined deployment by integrating a CI/CD pipeline, enabling automated builds and deployments to AWS EC2.

BLTC
CodeCraft · apps.apple.com/us/app/bltc-life-transformation-app/id6746760838
· Built core authentication using Firebase including login, forgot password, and reset password flows.
· Implemented the splash screen and onboarding UI and created quiz module integrating RES ful APIs.
· Integrated subscription logic and promotional code support using Stripe.

Hutfin
RenesisTech · hutfin.com/
· Constructed a decentralised Web3 application in Next.js and led smart contract integrations with Polygon and USD , reducing transaction processing times by 30% and enhancing reliability by 25%.
· Established marketplace functionalities including minting, lazy minting, listing, buying, unlisting, bidding, and claiming, improving user transaction experiences and increasing platform engagement by 40%.
· Applied authentication mechanisms with Google and Apple, streamlining user access and increasing registration conversion rates by 30%.

Dc-Vault
GoSaaS Labs
· Enhanced 20+ features and resolved 30+ major issues in the product, using ReactJs and Redux.
· Achieved significant code optimisation by refactoring, reducing code from 1000 to 100 lines.
· Improved UI design for better user experience, leveraging ReactJs and Fluent UI for intuitive interfaces.
· Formulated 40+ frontend test cases using Jest, significantly improving the code base and application stability.

Health Assistant
The Dev Corporate · www.touchmedical.ca/
· Engineered mobile-responsive interfaces with React.js and Ant Design, maintaining functionality across devices.
· Launched 10+ features and fixed 20+ bugs using React.js and ypescript and ensured cross-browser compatibility with BrowserStack.
· Established Google reCAP CHA for application security and useContext for efficient state management.
· Improved page load times by 40% using lazy loading, resulting in a 12.5% increase in site traffic.

Print app
The Dev Corporate
· Communicated & collaborated with a team of 4+ to develop the back end of this app using the NestJs framework.
· Designed Entity Relationship Diagram, developed 30+ RES APIs, and deployed them on Heroku.
· Integrated Stripe for payment, SendGrid for email verification, OneSignal for push notifications, and wilio for sending SMS to users and streamlined communication channels by 25%.

EDUCATION

Bachelor of Sciences in Information Technology
Punjab University College of Information & Technology · Lahore, Pakistan · 2022 · 3.47
· Awarded Merit-based scholarship
